3RD PHASE UPDATES

Date:13-09-2021

Dear Members,

Here is good news; Layout Developmental activities in the 3rd phase are initiated. As a part of 33 Acre layout developmental activity, geological team has been surveyed for water bodies and identified some locations for the bore-well drilling. We have initiated drilling for water bodies with Rig at one of the location and happy to share with you all that it was successful and we got very good yield of water about 3.5 inches. Rest of the infrastructural activities will be starting very soon in the STRR approved area by the Developer. Another about 30 Acre STRR approval is also under good progress and will be getting the approval soon.

Some of the photos and videos are shared for you information in the society official website www.sechsltd.in please visit.

Thanks for your support and request to keep cooperating in realisation of the 3rd phase at the earliest.

For and on behalf of BOD
