## 2) 3rd PHASE LAYOUT RELATED ACTIVITIES:

## 2.1 Nelamangala lands.

2.1.1 Regarding the purchase of 8 Acres and 27 Guntas of government land through a public auction conducted by the Karnataka Government at Bettangere village, Nelamangala Taluk, the Society has taken possession of only 7 Acres and 22 guntas. The amendment order for the lesser quantity of land allotted has been received, and the registration was completed on 07/02/2019. The process of updating the revenue records is ongoing. Members are already aware that the Society received a difference amount of ₹58.32 lakhs on 12/07/2018.

The total land available for Survey No. 50 is 24 Acres and 13 Guntas, with more than 12 allottees. As a result, updating the revenue records to match the total area and adjust the dimensions has been a tedious and time-consuming process. However, we are now in a position to complete the revenue record updation at the earliest. Once this is done, the Society will proceed with the sale process as per the earlier AGBM approval and further discussions held at the 35th AGBM.

2.1.2 Regarding the 12 Acres of land in dispute with Sri Vidyasagar, the Arbitrator has delivered his verdict. As per the verdict of the Arbitrator, Sri Kukkajee Ramakrishna Bhat, dated 11-03-2015, Sri Vidyasagar was directed to repay the amount collected from the Society within three months from the date of the verdict. If he failed to do so, he would be required to pay interest at 12% per annum from the date of the verdict until the full amount is paid. Meanwhile, Sri Vidyasagar filed an appeal in the Principal Civil and Sessions Court in Bangalore against the verdict, vide case No. Misc./119/2015. The Principal Civil and Sessions Judge ruled in favor of the Society, but Sri Vidyasagar has since filed an appeal in the High Court. Our legal team has proceeded with the execution process and the Society has paid the necessary stamp duty for it. The Society is now in a position to complete the

execution process and recover the money as per the Arbitrator's verdict.

## 2.2 Hoskote Layout Project:

The Board is regularly updating the status of the Hoskote project activities through Echannels, the website, and other communication platforms. Here are some key highlights consolidated and presented to the members as formal information during this AGBM for members' awareness:

## **Development Activities:**

- 2.2.1 The Society is pleased to announce that we have received STRR approval for an additional 43 Acres. After thorough verification of all necessary documents and survey sketches by the STRR authority, a total of about 77 Acres have now received STRR plan approvals. The approval process for the remaining land has also been initiated, with only minor corrections for the survey, conversion, connectivity and other issues. The Society has begun developmental activities in other sectors. Development work in these sectors, along with the previously approved 33 Acres, is progressing well.
- 2.2.2 A drone survey of the land has been carried out, and surveying and marking for the other sectors have been initiated.
- 2.2.3 The development works like electrical, sewage & plumbing works are underway. Earthworks, including cutting/filling, concrete works for drains, sewage pipes, drinking water lines, electrical ducts, and pathholes, are progressing well
- 2.2.4 For the earlier approved 33-Acre area, major civil works are completed and sewage & plumbing works are in advanced stages. Development work on further 43 Acres is also progressing, with major civil drains work is in progress. Electrical cabling work is being undertaken in major road areas, civil works are prioritized, taking the monsoon season into account.
- 2.2.5 Taking the monsoon season into account, additionally, earthwork for the remaining 20 Acres land is being undertaken to expedite development activities and meet scheduled milestones and targets.

- 2.2.6 The reconversion of cancelled land is also making good progress.
  Once the reconversion order is received, the modified plan will be submitted for STRR approval.
- 2.2.7 Pocket Lands: The committee has made every effort, with the help of a land aggregator, to acquire these essential connecting lands from farmers, as they are crucial for inter-sector connectivity and efficiency. However, convincing the farmers to agree to the exchange is proving to be a challenging and time-consuming task. About 12 Acres of crucial pocket lands for SECHS have been acquired through exchange and registered in the Society's name. A few more land pockets are still needed for better connectivity and efficiency. After obtaining these pocket lands, the modified plan will be submitted for STRR approval.
- 2.2.8 Sector-wise connectivity is also being addressed with cleaning leveling and taking position of the land.
- 2.2.9 The PODI for the 15-Acre area has made progress. Efforts are being intensified for the remaining land PODI, though challenges are remain.
- 2.2.10 Documentation work for approval of remaining land is under progress.
- 2.2.11 Efforts are ongoing for the vacation and positioning of lands from farmers who are cultivating.
